Project EQUIP prepares you for success.

Learn by doing. Learn by doing good.

Your career, your community
At Medaille College, your learning is hands-on and connected with the community. Through Project EQUIP, our faculty work directly with you to link classroom learning with real-world problem-solving—right from the first semester. Project EQUIP encourages early and continuous career exploration through community involvement and internships.

In every undergraduate program, you will get out of the classroom to apply your learning through team work, projects, and service in local organizations. By the time you graduate, you will have developed the skills that employers want, and you will have built a network you can rely on for future opportunities.

And because we know successful careers happen when you understand your profession’s impact on the community, we designed an experience that will connect your goals with the needs and opportunities in Buffalo, the region, and the world.

YEAR 1 EXPLORE your community and QUESTION your role
Build foundational skills for college success and achieve a greater understanding of yourself and your community.

YEAR 2 UNDERSTAND your major
Connect your academic major to important community issues while exploring career options.

YEAR 3 INVOLVE yourself
Through internships, field experiences, and service-learning projects, build your network and gain the skills that will empower you for career success.

YEAR 4 PRODUCE new knowledge
Apply your learning to solve real-world problems and create an original project that has the potential to make a difference.

Implementation of Project EQUIP is supported by a generous grant from The John R. Oishei Foundation, 2010–2012.
